CMap 2.0 Trial Installation Procedure

1. Insert installation CD or installation USB key.
2. Open installation support folder. You can find the CMap2.0 installation setup file: CMap2setup.exe (see picture below)

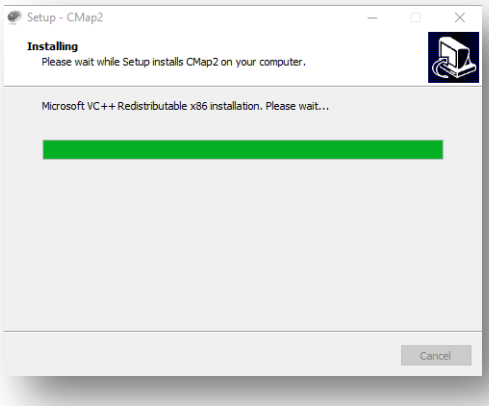

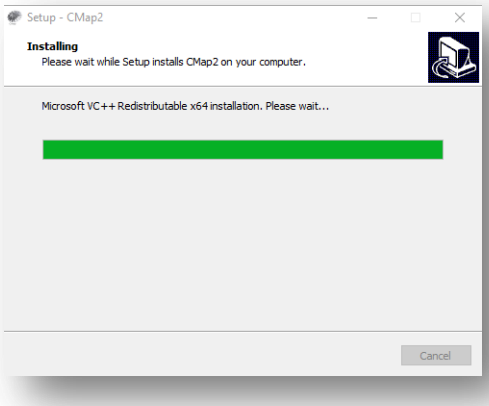

3. Double-click on CMap2setup.exe: the Cmap2 setup assistant starts. The software wizard installs the following components, in order:
    a. Microsoft .NET Framework 4.5.1
    b. Microsoft Visual C++ Redistributable
    c. SQL server compact edition 4.0
    d. CMap2 Window Service
    e. CMap2 GUI (Graphical User Interface)
    f. Sentinel SL Trial License

    a. Microsoft .NET Framework 4.5.1

    b. Microsoft Visual C++ Redistributable: the software wizard will try to install x86 and x64 component version. If your system is x86 operating system, the x64 component version will not be installed and the wizard returns "*x64 installation package is not supported on x86 Operating System*". In this case click on "*OK*" button and the wizard setup will proceed with installation procedure.

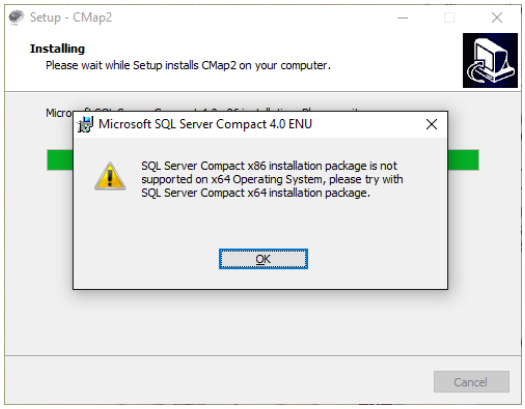

c. SQL server compact edition 4.0: the software wizard will try to install x86 and x64 component version. The wizard will only install the right version for your system. When it will try to install the not right version package the follow pop-up appears.

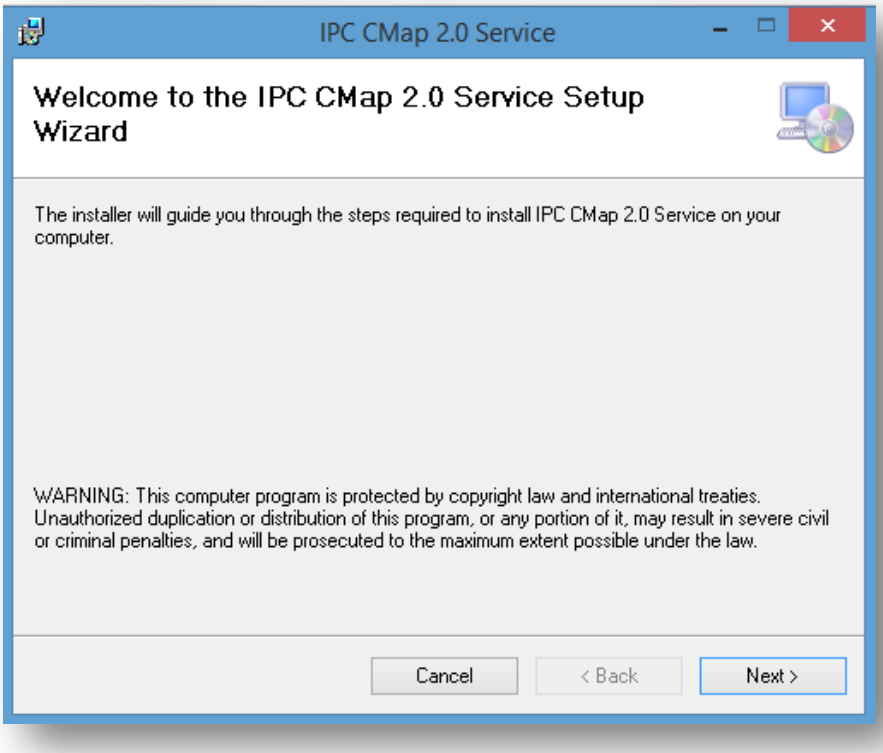

The wizard will only install the right version for your system. When it will try to install the not right version package the follow pop-up appears:

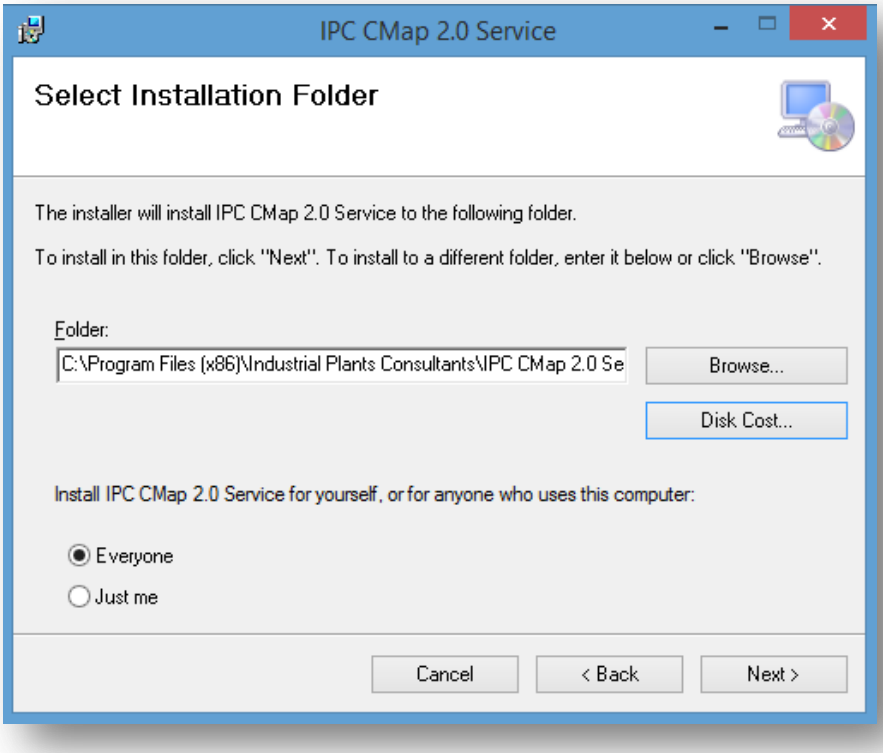

a,b and c are prerequisites. The following points show how the wizard installs the CMap2.0 Service and CMap2.0 GUI.
